

Last summer, race riots were instigated in Luanda providing a facade for further liquidation of MPLA cadre. Recently open warfare has broken out between FNLA and MPLA forces in that same area.

The effect has been to isolate the Neto faction and allow the CIA further room to maneuver. The Portuguese Angolan Secretary of State for Information announced recently that an agreement had been reached by all Angolan liberation groups--with the exception of Neto's faction.

#### ROCKEFELLER PUSHES LAYOFFS AS PRELUDE TO TOTAL SHUTDOWN IN NOVEMBER

Oct. 23 (IPS)--The Rockefeller family is moving full speed ahead with plans to shut down the U.S. industrial heartland. With the United Mine Workers scheduled to close down U.S. coal production starting Nov. 12, major auto companies already have announced plans to close their plants, throwing millions out of work.

Yesterday, Chrysler Corporation, the third largest auto producer, announced that it was \$8 million in the red for the last quarter. A spokesman said that Chrysler was losing money on every car it sold.

Last month, as part of a deliberate hoax, all three major auto companies announced plans to increase production due to expected increases in demand. No such demand ever materialized. Now all have announced layoff plans.

Meanwhile, they have accumulated large inventories of finished autos--ready to be sold during the miners' strike. Chrysler reports that it has an unprecedented 90-day stockpile of finished models. Ford and General Motors report similar stockpiles.

Workers in the northeast Ohio steel and rubber belt are bracing for the worst. The state of Ohio, almost totally dependent upon coal for fuel, may well be the hardest hit by the threatened coal strike. McKeesport steel closed down Oct. 18, and layoffs were announced for Youngstown, Republic, and other area steel plants. Rubber workers are being given ultimatums--accept either layoffs or massive paycuts.

Meanwhile, French autoworkers are waiting to receive termination and layoff notices from Citroen, which is heading for a \$200 million deficit.
