

The intent behind the conspiracy is to cripple and contain U.S. Labor Party organizing which successfully has focused the growing politicization of auto and other workers against the fascist National Employment Priorities Act, authored by Trilateral Commissioner Woodcock's staff and sponsored by Trilateral Commissioner Senator Walter Mondale. The Labor Party campaigns especially have exposed massive in-plant drug, alcohol, and "troubled worker" brainwashing programs aimed at militants, which Woodcock has pioneered for Rockefeller, and Woodcock's role in planning the Nov. 12 "coal strike" to engineer industrial collapse.

#### ITALIAN CP CHIEF AMENDOLA BACKS ROCKEFELLER'S LINE FOR EUROPE

Oct. 29 (IPS)--In a public speech Oct. 26, Giorgio Amendola, the Rockefeller agent in the Italian Communist Party (PCI), called for making Europe into a "third force."

This is precisely the strategy outlined by the Rockefeller Trilateral Commission's secret meeting in Bellagio, Italy two weeks ago.

To make sure he would not be misunderstood, Amendola identified his demands as identical with a proposal by Altiero Spinelli. Spinelli, the Italian Common Market Commission representative, is a CIA agent and fellow traveler in Trilateral circles. In his speech, Amendola also mouthed the fascist Zero-Growth line put forward by John D. Rockefeller III and he demanded an explicitly corporatist solution to the present economic crisis.

Amendola's colleague in the Italian Communist Party's Central Committee, Gian Carlo Pajetta, called for a merger of the PCI with the infamous Second International in an interview in the PCI's weekly Rinascita. Identified long ago by the Soviet Union as a bevy of agents, the Second International is now dominated by agents like United Auto Workers President Leonard Woodcock and Austrian Chancellor Bruno Kreisky. Fresh from the Warsaw conference of European Communist Parties where he helped lead the implementation of a Chile-style "National Road to Socialism" turn, Pajetta elaborated on Amendola's plans to sell out Italy's working class. Pajetta in the Rinascita interview dug up the Yalta Memorandum, which infamous PCI leader Palmiro Togliatti issued from his deathbed. This memorandum insists on the "National Roads" theses which successfully aided the spineless Togliatti in subverting the Italian revolution after World War II.

The situation, engineered by traitors in the PCI leadership, was summarized by the financial daily Il Globo. Controlled by key Rockefeller operative Ugo La Malfa, Il Globo proclaimed that detente is dead because world communism is in shatters.
