

MEXICAN "HEADACHES" LEAD TO SEAL AND SEARCH OPERATIONS

MEXICO CITY, Nov. 23 (IPS)--The Mexican Procuraduria General issued an order Nov. 19 for the apprehension of phantom CIA guerilla leader Lucio Cabanas. Going on an inside report, provided by an arrested Cabanas collaborator, that zombie Lucio frequently comes to Mexico City to receive clandestine treatment for "headaches," the police have initiated seal and search operations in certain areas of the capital city, thereby stepping up their campaign of progressive harassment and terrorization of the left and the population in general.

The appropriate climate was created the night before with a series of 14 bombings of public buildings, banks, and other "Mexican and gringo millionaire" establishments both in Mexico City and in two outlying major cities--Guadalajara and Oaxaca. Authorities attributed the bombings to the FRAP and the Liga 23 de Septiembre, two CIA terrorist countergangs already fully exposed in IPS.

These bombings follow last month's surprise appearance of leftist "police killers" in Mexico City, which led to similar seal and search operations. At that time, only the Latin American Labor Committees exposed the terrorist activities as operations of CIA-controlled countergangs and zombies.

DEINDUSTRIALIZATION UNDERWAY: 200,000 LAYOFFS EXPECTED THIS WEEK

DETROIT, Nov. 23 (IPS)--The next target date for a major wave of industrial layoffs is timed to coincide with the Thanksgiving week holidays. At least 200,000 layoffs nationwide will occur by this coming Monday.

New Detroit Inc., one of Rockefeller's counterinsurgency organizations, announced here yesterday that unemployment is 26 per cent and that it will rise to 40 per cent by Christmas.

Autoworkers will be the hardest hit, with all major auto producers and related parts plants having already announced lay-off schedules. Steel companies have also announced that the Nov. 27-Dec. 1 period will be marked by "drastic production cutbacks and layoffs," due to auto production cuts and coal shortages caused by the CIA-rigged coal strike.

The effect of major production cutbacks in auto and steel are rippling through every industrial sector, causing additional layoffs in rubber, glass, and electrical.

The process is by no means chaotic--it is part of pre-planned deindustrialization transparently covered by new energy hoaxes caused by the Mideast war and the CIA's coal strike.

Many of the plants will not be opening again; like Chrysler they are slated for shipment to Iran, Brazil, or some other development zone in the Third World.

Most companies blatantly telegraphed this move, accumulating vast stockpiles of inventories while a reduced workforce was sped up. As early as Sept. 13, workers at Flint's Buick Gear plant had observed that their plant was stockpiling "at an unbelievable rate" and that workers knew that there wouldn't be any work by December. There have been similar reports from workers in other sectors over the last two months.

Brazilian Hellholes

To meet new production schedules that call for a smaller workforce to match previous production levels, the plants are being converted into Brazilianized hellholes. At Ford's massive River Rouge complex, one-third of the workers have been laid off, while the rest of the plant works on 12-hour shifts. All production merely increases Ford's already large inventory of unsold cars. At Ford's Sterling Axle, 600 workers have been laid off over the last two weeks, while the rest of the plant is working 12-hour shifts, six days a week, to build up stockpiles.

Nowhere is the process clearer than in the case of Chicago's Inland Steel. While older, less efficient plants in the area have been placed on three- or four-day weeks, the Inland workforce is on a six-day schedule.

It is this hell that will face workers who return after their "furloughs"--those lucky enough to return at all.

ARAB HIJACK AIDS CIA PROPAGANDA

Nov. 23 (IPS)--The drama surrounding the latest terrorist hijacking of a British jetliner in the Arabian Gulf sheikhdom of Dubai by the ad hoc "Abou Mahmoud Group" was designed by the CIA to create an appearance of left-wing "pressure" on so-called Arab moderates like Egypt's ex-Nazi President Sadat and Palestine Liberation Organization boss Yasser Arafat.

The latest incident of CIA terror began in Dubai, a police-run province of the United Arab Emirates. Until late last year, the United Arab Emirates Intelligence chief was a British citizen, and the entire country is administered from London by the Gulf arm of British Intelligence. Further evidence for the
