

## GOVERNMENT ANNOUNCES AUTO RELOCATIONS TO BRAZIL AND IRAN

Nov. 30 (IPS)--While at least 200,000 U.S. autoworkers are booted out of their jobs this winter, the government will vastly increase the rate of shipment of old auto plant and equipment to Brazil, a United States Commerce Department spokesman reported today. According to a special report prepared by the State and Commerce Departments, the spokesman stated, over \$1 billion in auto vehicle production equipment "could" be sent to Brazil between now and 1976, along with at least \$1 billion in auto parts production equipment--a clear indication that plans of this sort are being carried out.

Simultaneously, Iran National, Iran's state-owned auto industry, announced that it has negotiated a more than \$555 million investment contract with the failing Chrysler Corporation for its idle plant and equipment. The Shah, one of Rockefeller's major conduits for buying up world industry and controlling world investment, also took a controlling interest in a financially healthy part of the world auto industry this week--Daimler-Benz.

These announcements, like the daily contradictory announcements of thousands of layoffs in the CIA press conduits around the country, are not merely weapons for psychological terror. Already approximately one out of four "temporary" layoffs in the auto industry--where the number of unemployed will hit 165,000 next week--are turning out to be permanent. If Rockefeller continues to have the political freedom to turn off the credit spigot, not only the equipment, but thousands of these workers themselves will join their European and Japanese brothers in their rebuilt, antiquated factories in Iran and Brazil--implementing the massive deindustrialization of the advanced sector. This deindustrialization is a conscious strategy of the Rockefeller cabal, aimed at destroying living standards in the advanced sector and outflanking the Soviet Union's only ultimate resistance to Rockefeller takeover, the threat of nuclear destruction of the United States and Western Europe.

### Dividing Up the Loot

The Commerce and State Departments' report on industrial relocation projects states that Brazil's auto production will increase two-and-one-half times between 1973 and 1980, while annual exports of all machinery, equipment and services to Brazil will jump to \$10 billion per year by 1978. Carried out at the expense of industry in the advanced sector, this will not represent an advance even for the citizens of the Third World, but an accelerated looting process.

Spokesman for the Treasury Department Gerald Parsky spoke last Monday before the American-Arab Association for Commerce and Industry on other plans for industrial relocation. Unlike

Brazil, the Middle East is slated to receive primarily fertilizer and petrochemical plants rather than heavy industry. In reference to projected Arabian investments, Parsky noted that one major bottleneck was the "scarcity of human resources"--a lack which a special organization "staffed by experienced foreigners" would be taking care of soon.

#### IEA ORDERS ENERGY CUTS HERE AND IN EUROPE

Nov. 30 (IPS)--The cuts in energy consumption prepared by Rockefeller's International Energy Agency (IEA) for a world "energy emergency" are already being implemented.

Figures released last week by the West German Tribune's Economic Affairs Review show that cuts in oil consumption in 1974 have reached 17.2 per cent in West Germany, 12 per cent in France, 8.9 per cent in Britain and nearly 7 per cent in the United States. The IEA's preliminary target is a 30 per cent cut.

Meanwhile, the heads of Canadian Energy Allocation Division and Energy Conservation Department announced that they have worked out--in coordination with the IEA--mandatory programs that will cut Canadian energy consumption by 14 per cent, including an embargo on exports of petroleum to the United States --beginning with a reduction of 28 per cent by next July.

Rockefeller thus has jumped the gun on the energy austerity drive, planned to go ahead full steam following a new oil embargo. The supranational body, whose control belongs nominally to the United States and de facto to the Rockefeller oil companies is ordering energy cutbacks while its lackeys within the governments of Western Europe and the United States are scurrying to comply.

#### EAST GERMANY AND DKP DENOUNCE SCHMIDT BUT NOT HIS TRADE UNION CRONIES

WIESBADEN, BRD, Nov. 30 (IPS)--Both the German Democratic Republic (GDR) and the West German Communist Party (DKP) have added their voices to the European Labor Committees in attacking this week's meeting of multinationals, governmental figures and Tri-lateral Commission members in the West German trade union leadership, held from Nov. 25-27 at the offices of the Friederich Ebert Foundation in Bonn.

The Ebert Foundation is a counterinsurgency agency controlled by the Social Democratic Party (SPD). Named after the
