

### **Psychological Warfare, Police Intelligence and Police Methods**

The psychological warfare campaign created by the Institute and the Rand Corporation and propagandized by the controlled press did not stimulate the environment of psychological terror within the population. The spate of articles on "nuclear terrorism," citing plutonium thefts from reactors and the scope of the terrorist operations internationally, did not take hold as the computer printouts had designed. Efforts to coerce the population psychologically into accepting fascist police state measures to "stop terrorism" failed. The psychological warfare operations failed in part because the covert nature of the operation was blown. Whenever a covert counterinsurgency operation becomes politically exposed before the general population over an extended period of time, then, should the operation proceed, the results will tend to produce the opposite of its intended effect — the coordinators of the operation will be identified by the targeted population as its main enemy.

At bottom, it was the mobilization launched by the Labor Party since the Glassboro Terrorism Conference last April 27, which put into motion working class forces against the terrorist controllers — Levi, Raskin, et al. — thereby providing President Ford and other pro-Constitutional forces with the crucial political leverage to prevent the total activation.

With the psychological warfare aims of Rockefeller significantly countered, political intelligence and evaluation work by Labor Party Security staff directly forced the next crucial question — reliability of intelligence. A major factional fight developed over a period of months within law enforcement agencies over both the reliability of their intelligence on terrorism and the "chain of command" responsibility for directing police actions against the countergangs and terrorists.

For example, in Philadelphia, the regular police force was not briefed by those who controlled and had access to the flow

of information on the July 4 events. All intelligence was centralized in the Justice Department's Civil Disturbance Unit under Levi's personal man, Deputy Attorney General Harold Tyler. This is where the Treasury Department's ATF, the FBI ad Lieutenant George Fencel of the Philadelphia P.D.'s "Civil Disobedience Unit" receive and feed intelligence. If the Philadelphia police were receiving intelligence, it was misinformation. Necessarily, the police were compelled to depend upon the USLP to provide intelligence estimates and evaluation for the police to conduct their own investigations without the interference of some "higher authority." As the intelligence was checked, cross-checked, and verified by police departments throughout the country, extensive surveillance of known terrorists and groups which are known to harbor terrorists went into effect.

Another important aspect of police intelligence operations is leads — information that has yet to be developed into solid intelligence. After years of watching terrorists run rampant through this country, any serious and honest cop begins to discern a pattern. He instinctively suspects that such actions could "succeed" only if his superiors are somehow screwing up. What he lacks is an overall picture of these terrorist operations — a picture that will help him identify the nature of the beast. This has been provided by the Labor Party. As a result, the cop on the beat is better able to provide sound intelligence, simultaneously upgrading the overall function

of a democratic police force by knowing how to create the conditions to act upon this intelligence. It was on this basis that the constitutionally aligned police acted upon Labor Party intelligence input and undercut the Justice Department-Institute-LEAA-trained police networks, whose methods are designed to facilitate the growth and continuance of terrorist activity.

To dismantle the terrorist networks altogether, however, identification of Levi and Raskin as their controllers is still required.

### NSIPS Exclusive Translation from *L'Europeo*

## "Another Pearl Harbor in the United States?"

*June 10 (NSIPS) — The following box appeared in the News of the World section of the July 9 Italian magazine L'Europeo.*

Back is the talk about nuclear terrorism, biological terrorism in the report on "International Terrorism" that the CIA has declassified in the last few days. According to the Agency, in the next few years, the terrorists will start to use from missiles to powerful modern weapons, and most of all biological and bacteriological systems. For example, they (the terrorists) could disseminate radioactive substances in a city, as they tried already in Vienna two years ago. Moreover, another "black" group told *L'EUROPEO* in France that a terrorist group was cultivating the possibility of contaminating the ballot boxes with biological substances and using

the radio to broadcast news of the poisoned ballots. It is certain that such news, even if false, would terrorize many voters.

In any event, it is certain that American authorities are very much worried about terrorism to the point that in a press conference that took place in New York few days, some experts warned against the possibility of a new maybe nuclear Pearl Harbor by terrorists against an American city on the occasion of the Fourth of July Bicentennial celebrations. The CIA replied they are aware of it and that the CIA has a system of defense based in a computer named *Iterite*, with which it can constantly keep track of terrorist groups anywhere in the world. In the next days the computer will be fed information about the bigger American cities.
