

LaRouche: 'I Name My Would-Be Assassins'

In This Section...

The Executive Intelligence Review in recent weeks has published exclusively the breaking news of the attempted assassination operation against Lyndon H. LaRouche, Jr., the Chairman of the U.S. Labor Party and the widely acknowledged conceptual architect of the new European Monetary System launched in the July summit of the European Community at Bremen. On Sept. 7 LaRouche issued a statement from his New York headquarters naming the "Black Maltese" networks behind the threat to his life, and identifying the strategic juncture in September by which the European Monetary Fund, Arab Monetary Fund, and the Tokyo capital market will establish a new gold-linked world monetary system supplanting the International Monetary Fund. It is this new world economic order — described in depth by LaRouche in the recently issued Executive Intelligence Review supplement, "The Facts Behind the New Monetary System," which the would-be assassins are intent on preventing.

As a crucial component of the current world strategic picture, therefore, our COUNTERINTELLIGENCE report this week brings EIR readers LaRouche's Sept. 7 statement, as well as a summary of the "Black Maltese" plans against Guyana's former Foreign Minister Frederick Wills and current Prime Minister Forbes Burnham, plans which are integral to the conspiracy against LaRouche. Wills in particular is internationally celebrated as a Third World spokesman for the new world economic order.

As LaRouche pinpoints in the statement printed here, it is not only his own prior role as author of that economic order which has made him a potential assassination target, but the expectation of his continued important influence in leading U.S. circles for the policy decisions ahead.

Since certain governments, especially the British monarchy, have a proven capability for assassinating even well-defended prominent figures, physical security and related precautions are indispensable, but inadequate by themselves.

The optimal defense against a terrorist kidnapping or assassination today is to name publicly the forces responsible for deploying the terrorists. This confronts the forces behind the assassination with a two-fold problem: the problem of having a "martyr" lain at their political doorstep, and the additional problem, that the next assassination-target might be inspired to take preemptive action against the forces behind his or her projected killing.

This security precaution is not absolute, but it obliges the enemy to incur a far greater risk and penalty, and, in many instances will deter the assassins from completing the project — for fear of giving credibility to the charges made. The best protection is good physical security plus naming those responsible for one's projected assassination in advance. It is not perfect, but it is the next-best thing to preempting the situation by more direct countermeasures.

To my knowledge, I have been targeted for political assassination during three intervals of my life. The first, in which our own independent findings are partially corroborated by an FBI Freedom of Information Act release, involved elements of the Communist Party USA as among those mooted the project, and elements of a Puerto Rican terrorist group deployed into New York City for such a task. This was at the close of 1973 and beginning of 1974, overlapping a coordinate operation which included "black operations" by high levels of the British intelligence organization MI-5.

The second was deployed during the summer of 1977, for which the current crop of international terrorist forces were to have been deployed.

The third was deployed during July 1978, with known elements of the operation caught red-handed in assassination-support deployments and an actual kidnapping-murder mode of coordinated deployment by criminal elements at the entrance to a Detroit meeting-place.

The abortive operation of July 1978 has been refurbished at a higher level of commitment, with

known elements of British intelligence and Zionist organizations caught red-handed in the overall operation, including known top Israeli assassins operating on loan in operations against the U.S. Labor Party within the U.S. as well as other countries. Through aid of other forces, including most-capable intelligence and security organizations, we now have a true bead on most of the top-most elements of the assassination operation. We may not yet know the name of every prominent figure to be held accountable, but we know the names of a very large number, with unchallengeable precision.

Earlier, we have published names of persons and organizations known to be accountable for these evil-doings. In this report, I shall emphasize the nastiest component of the overall forces involved: a direct and witting alliance between Nazi and Zionist organizations. I do not mean "Nazi" in the looser sense of "fascist"; I mean components of the wartime Nazi political-intelligence organizations, including some of the most brutal of the war-criminals from World War II.

The Assassination Project

I am currently targeted for assassination by the same network of forces which, during the past thirteen months, has murdered such persons as Jürgen Ponto of the Dresdner Bank, Hanns-Martin Schleyer of Mercedes-Benz, and former Italian Prime Minister Aldo Moro. The organization behind my projected assassination has the same general motive as governed its actions in the three cited cases.

The central, strategic objective subsuming the projected assassination is that of disrupting the European Monetary Fund, the Arab Monetary Fund, the Tokyo capital market, and collapsing the value of the U.S. dollar and the internal U.S. economy itself. Ponto, Schleyer, and Moro were murdered because they were effective leaders in some aspect of the processes contributing to the success of the kinds of policies put forward by President Giscard d'Estaing and Chancellor Helmut Schmidt at the Bremen EEC "summit" of July 1978.

These proposals will begin to bring the value of the U.S. dollar up dramatically as early as September 1978, will promote capital-goods exports from the U.S., and will establish a gold-linked, new world monetary system, by passing the International Monetary Fund and World Bank, and ending the two centuries of domination of world finance and trade by the City of London. According to leading spokesmen of the forces who have ordered my assassination, I must die for two reasons. Not only do they identify me as a principal conceptual contributor to the emergence of the Bremen policies; they regard me as a continuing asset to the success of the Bremen agreements, and as potentially an influential figure among leading circles within the U.S.

The center of the assassination plot is the British

monarchy and the "Black Maltese" oligarchical and financial institutions of the City of London and Canada.

The project as a whole, like the fabled hydra, has numerous tentacles in many nations, including influential circles allied to Henry A. Kissinger, Zbigniew Brzezinski, James R. Schlesinger, and top elements among certain investment banking firms — such as Lazard Freres and Warburg Pincus — in New York City. The tentacles include, at lower levels, leading Zionist circles, leading, avowedly fascist organizations, "left wing" and "environmentalist" circles, and elements such as the Heritage Foundation. The tentacles also include, in West Germany, circles acting *ultra vires* in misuse of powers of state institutions, notably in conducting the financial warfare against the European and U.S. Labor Parties which is an integral part of the overall assassination-plot operation.

Bronfman et al.

The figures of Edgar Bronfman and his aide, Major Blumfield, afford a useful point of reference at which to pick up the threads of the conspiracy as a whole.

Bronfman exemplifies those elements of the international Zionist organizations and circles which have been overtly linked to fascist organizations since no later than 1961, and which at the same time, are interlocked at high levels with the British monarchy and the Black Maltese networks generally. This is not a matter of allegations or suspicions, but of overt connections, well-documented.

Notable is the case of the Permidex entity and a now-liquidated former subsidiary, conduits for distributing funds to fascist groups.

Bronfman's networks intersect financial and other operations of France's Edmond de Rothschild. Both intersect financial operations of the highest political ramifications of the West Germany Bank fuer Gemeinwirtschaft. This bank, whose best-known leading figures are "anti-Bremen" and "anti-economic-growth" opponents of Chancellor Helmut Schmidt's policies, have interlocked, notably since Willy Brandt's accession to the Chancellory, with the directorship of the Bundespost (Federal Postal Service).

The Bank für Gemeinwirtschaft, nominally the largest deposit-facility for the funds of Germany's trade unions, prominently interfaces City of London financial operations and certain aspects of Israeli and Zionist operations, all of which latter are eminently political in quality or principal implications. Although the key figure, formerly with the Bank für Gemeinwirtschaft, and now leading figure of the Bundespost, Walter Hesselbach, is not officially a member of the Jerusalem Foundation, a Bronfman-centered organization, Hesselbach is justly rated as virtually a member by spokesmen of the Jerusalem Foundation.

Hesselbach's most-visible political, institutional and financial associations subsume every principal aspect of financial warfare and other attempted violations of human rights of the European Labor Party in West Germany.

The Bronfman-Edmond de Rothschild power within such Zionist organizations as international B'nai B'rith (e.g., Basel, Switzerland, a key funding-location for international terrorist operations) subsumes the B'nai Brith links to Nazi and other fascist organizations in various nations. The Permindex case is bloodily clear. Although no Bronfman link to the key, Interarmco, operation is established, Interarmco is a problematic case intersecting Zionist operations generally.

For example, the Anti-Defamation League has endorsed persons associated with the most hideous among all Nazi organizations of World War II, the Croatian Ustashi. Although U.S. Zionist organizations' penetrations of the top circles of Shelton's Ku Klux Klan organization is sometimes passed off as a Zionist intelligence penetration of that and other organizations, the fact is that certain Zionist circles support and run that and other so-called "far right" organizations.

The ADL sympathies for Croatian Nazi war-criminals' circles are not some exotic aberration. The Lebanese Falange, Israel's puppet-force in Lebanon, is not only a creation of the Nazis, but is a Nazi organization still headed by the Nazi, and devout Hitler admirer, whom Hitler personally authorized to head the organization.

The Sovereign Knights of Jerusalem

The splits and regroupments which have occurred in the Order of Malta since 1798 easily mislead the casual onlooker. Although there are some good or neutral persons within some branches of the order, and a certain portion of the unwitting coopted as public relations decorations to most, the Order as a whole is a British-coordinated mass of pure evil, fully justly the New Testament name, "The Whore of Babylon" for the Order's pre-Christian origins. The most shamelessly thuggish of the various branches of the Order is an entity ordinarily designated as the Eastern European branch, the *Sovereign Knights of St. John of Jerusalem, Order of Malta*. This group is formerly distinguished from the strictly British branch — the Venerable Military and Hospitaller Order of the Knights of St. John of Jerusalem, from the Rome-based and French Catholic branches, from the main German branch, and from the Dutch-led Prussian and Scandinavian branch — plus the various priories.

The Eastern European branch is essentially identical with "fascist international." The Nazi Party of Germany was created by the order, as were the Croatian Nazis, the Ustashi, and the Lebanese Nazis,

the Falange. The assorted, main fascist organizations of Eastern Europe — Ukrainian, Polish, Romanian, Hungarian, and so forth, are also creations of this branch.

The relevant history of this branch is adequately summarized for present purposes as follows.

The Order of Malta moved to Malta after its dislodgment from Rhodes. It received sovereignty from the Hapsburg Emperor, Charles V. In 1798 Napoleon conquered Malta for the chief purpose of breaking up that nest of evil. Part of the disbanded order located itself in Italy and other Western European locations. The official Maltese leadership moved to Russia, where it began an integral and crucial part of British intelligence operations in Eastern Europe. The Polish branch of the order was established under the Radziwill family — the same.

At the beginning of the present century, the Russian-based order, allied to the royal house of Yugoslavia, moved to the U.S. and Canada. However, that branch left two important branches—besides the Yugoslav branch—behind: the Lebanese branch, and the Bavarian branch. Subsequently, the Eastern branch reactivated its operations in Europe.

The Bavarian sponsor of this fascist branch of the Maltese Order was the Wittelsbach family, including Ludwig III and Prince Rupprecht. To keep matters orderly, the Wittelsbach house was a British client. When the Wittelsbachs created Hitler and the Nazi Party of Bavaria in concert with Houston Chamberlain of British intelligence, there was nothing paradoxical in that co-sponsorship. The hard-core leadership of the original Nazi party was almost entirely Bavarian personalities sponsored by the Bavarian division of the Eastern European branch of the Order. It was the City of London, with emphasis upon S.G. Warburg, Hjalmar Schacht's patrons and guide, which brought Hitler's influence north of Bavaria, and it was Schacht and his London backers who later put Hitler into the Chancellory.

So, we have the following Nazi and fascist organizations created and maintained by this branch of the Order.

The Nazi Party of Germany.

The Nazi Party of Croatia, the Ustashi.

The Nazi Party of Lebanon, the Falange.

The various fascist organizations deployed under the cover of the "Captive Nations" front.

The element of the original Maltese Order families associated with Italy and Switzerland (Geneva) was formerly assimilated into the reconstituted Sovereign Order, based in Rome, but represented otherwise a direct interlock between the Rome-based Order and the Eastern European Order. These Italian "black nobility" forces created the Mussolini regime (e.g., the House of Savoy), and were key in the Italian Nazi organization governing the rump government of Nazi-

occupied northern Italy during the post-1943 period.

The Zionist circles, including the present Israeli governing circles, complicit in the business, including key elements of the international B'nai B'rith, are allied with the Lebanese Nazis, the Croatian Nazis, and with the fascist organizations of such nations as Italy and France, as well as closely interlocked with the Eastern European "Captive Nations" groups.

The Zionist links into the Shelton branch of the Ku Klux Klan are not merely parallel to the same Zionist faction's links to the Maltese fascists. The Ku Klux Klan was a resurrection of the treasonous secret organization, the Knights of the Golden Circle, the latter suppressed for its role in the assassination of Lincoln. ("Kyklos" is Greek for "circle.") The original knights were a British intelligence operation, established as a continuation of an earlier, Tory, British intelligence network deployed against the American Revolution and the constitutional republic. The Knights' regalia and ritual were parodies of the costumes and mumbo-jumbo of the Maltese Order.

The Overall Networks

Apart from Peking intelligence and some odds and ends, there are three principal, top-most elements to be considered in the assassination operation. The topmost layer is centered in the British monarchy and the City of London. These serve as reference points to pull together the "black nobility" of Europe around the Maltese Order. These forces control a powerful network dominating the international organizations of the Socialist International. These networks created and control, top-down, the principal Zionist organizations.

Hence, to say that the British monarchy, the City of London, the Black Maltese, the British faction of the Socialist International, and the British Zionists all participate in creating and deploying international terrorism ought to generate no confusion. These entities are all participating aspects of the same thing.

This same combination of forces is also the opposition to the Bremen agreements, the backing of the "environmentalist" ferment, and is the source of every notable slander, harassment, and other attacks against the U.S. Labor Party and its allies in every part of the world.

There is not a single case of slander, harassment or other attack against the Labor Party whose authorship is not now known and proven to emanate from these indicated circles.

The 1974 Giannettini report, which details the point that Israeli intelligence has coordinated international terrorism since approximately 1969, is confirmed not only by the Klein case, but by many key intelligence and security services and in large part by our own direct investigations.

So, we are not astonished, when digging into a dirty harassment operation run against us in New York, to turn up a notorious, convicted, top Israeli intelligence assassin in the middle of coordinating that operation.

Obviously, the list of names of persons who are wittingly complicit either in the assassination project itself, or in slander, harassment and overtly criminal operations otherwise integral to the assassination operation as a whole, is very long. This list is limited to agencies and persons of established, witting complicity. They will be named.

—Lyndon H. LaRouche, Jr.

Guyana End Of Assassination Plot

Printed below is a Sept. 7, 1978 statement issued in New York City by the U.S. Labor Party National Executive Committee:

We have just received the original text of a libel against U.S. Labor Party Chairman LaRouche first published in Georgetown, Guyana ten days earlier. The slander, issued by a New York City-groomed Maoist, one Kester Alves, alleges that LaRouche is notably complicit in an attempted destabilization of the Guyanese government by U.S. intelligence agencies.

The facts of the matter, developed with the aid of most-reliable sources, is that IMF and allied British agencies are attempting to manipulate Guyana's Mr. Forbes Burnham into unblocking an assassination

order against the celebrated former Foreign Minister of Guyana, Mr. Fred Wills.

At present, a task-force is deployed, with the purported blessing of the Guyanese government, to maintain heavy surveillance and harassment operations against Mr. Wills. The head of the task-force, a known person, is prepared to arrange an assassination if given authorization to proceed. To latest knowledge, the waiting assassin has been given no "kill" go-ahead. The slanderer, Alves, is part of the conspiratorial group attempting to panic Forbes Burnham into taking responsibility for allowing the murder to be authorized.

Not astonishingly, the included target of the operation is Mr. Forbes Burnham himself.

Although Mr. Burnham has capitulated to the geno-
