mately 2.8 times more cases than in the Watkins Report's projection. In other words, the bill in the U.S.A. alone during the next presidential term, based upon the methodology in the Watkins Report applied to the higher caseload baseline, will be at least \$186 billion, not including costs for research, public health, as well as indirect costs.

Therefore, as a massive cost-containment measure the Establishment has advanced its slogan of "hospices, not hospitals."

The Establishment policy

It is to serve the interests of massive cost-containment that the government material to the population on AIDS—from the simplistic and scientifically incompetent Koop brochure to the Academy of Sciences and Watkins reports, contain blatant misinformation. It is not just that the government is lying. They are all lying in a certain way. Their real agenda is not crushing the virus. Their agenda is:

1) Malthusian genocide of black, brown, and yellow races, and birth control among minorities in the so-called advance sector, in the name of "dealing with" the world economic crisis; 2) euthanasia; 3) drug legalization and free dispensing of needles; 4) explicit sex education for children; 5) hospices, not hospitals.

The ugly nature of the government's commitment to policies which will lead to the needless murder of millions is indicated by the fact that, recently the head of the American Medical Association (AMA) claimed that 80% of America's physicians support the Nazi practice of euthanasia or withdrawing life-support from the so-called "hopelessly ill," a crime against humanity for which Nazi doctors were hung at Nuremberg after World War II.
