'The New Economy'

As the financial system crumbles, and the U.S. economy disintegrates at an accelerating pace under the criminal, treasonous negligence of Barack Obama, Lyndon LaRouche will hold an international webcast Sept. 24, in the Washington, D.C. area, to speak on "The New Economy" (www.larouchepac.com).

LaRouche will speak from the vantage point of the political fight he is waging internationally to bring that "New Economy" into being: for a new credit system based on the restoration of the Glass-Steagall law in the United States, the Bretton Woods fixed-exchange-rate system globally, and for the indispensable leading edge of the recovery in the United States—NAWAPA (North American Water and Power Alliance).

Central to that "New Economy" are the scientific breakthroughs being made in the concept of infrastructure pioneered by LaRouche and carried forward by the LaRouchePAC Basement Team of young scientists, which have been the subject of recent articles by LaRouche. These breakthroughs are already inspiring political and economic circles internationally, to join in developing the NAWAPA idea of upgrading the Biosphere for other regions of the world as well, including Russia and Central Asia, Sub-Saharan Africa, and the South American Darien Gap.

LaRouchePAC has produced a series of videos which bring the significance and excitement of such terraforming projects to life, not only for the western United States, but for Africa and Central Asia as well. Engineers and others in the western states are responding with excitement, and bringing LaRouche Youth organizers into their classrooms, to spread their optimistic perspective to their students.

Of course, as LaRouche has stressed, the pre-

condition for these developments is the constitutional ouster of President Obama from office, before the ongoing collapse reaches a point of no return.

It has become clearer, as each day passes, that Barack Obama is not only a failed personality and a failed President, but a British puppet, committed to the imperial genocide agenda. The President chose an economics advisor, Larry Summers, who explicitly embraces the Nazi doctrine of "creative destruction" as his economic policy—and he has moved to carry it out. The President continues to demand genocidal cuts in health care for the old and poor—Medicare and Medicaid—lying that the expense of caring for these populations is the structural cause of our financial deficits. And this President continues to ferociously oppose the very policies—Glass-Steagall, the manned space program, fusion power—which are required to reverse the disintegration of our economy.

The Obama Administration itself has become a threat to civilization.

This reality must be clearly in our minds as we fight for Glass-Steagall and NAWAPA. LaRouche has not devised a "scenario" for Obama's removal from office, but many potentials exist. The crucial element is the understanding among leading patriots, as well as the population as a whole, that Obama's remaining in power is incompatible with the survival of our nation, and the planet.

"The New Economy," as LaRouche has defined it, is not just the most attractive item on the menu of options we face as a planet—it is the *only* option. We have reached the point where decisions must be made, as in warfare, before the election. We urge you to, in the words of the late Mexican President José López-Portillo, to listen to the wise words of Lyndon LaRouche.
