

where that is driven through the village. Under this guise, everything that is still somewhat normal here, that maintains the landscape, that operates clean pasture management, that operates clean agriculture, is destroyed. It's destroying family farms, it's destroying

everything. It's actually just *causing* more hunger. And every year, 70 million more are added.

I can't think of anything else. I wanted to bring this addendum, but now I really have to go back to the barn.

## Greetings From Kansas

*This is the edited transcription of a live report from the State Convention of the Kansas Cattlemen's Association by Robert Baker to Panel 2, "The Science of Physical Economy," of the Schiller Institute's Nov. 13-14 Conference, "All Moral Resources of Humanity Have To Be Called Up: Mankind Must Be the Immortal Species." Mr. Baker is agriculture advisor to the Schiller Institute.*

Hello! I'm Bob Baker, with the Schiller Institute. I'm in Kansas, at the Kansas Cattleman's Association state convention.

Kansas is one of the largest producers of beef and wheat in the world. We are joining together with

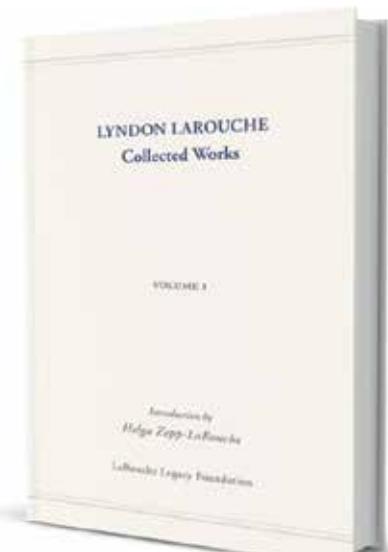

food producers around the world to stop hunger. We have in effect a resolution to restore the Glass-Steagall Act for bank re-regulation. And I would like you to hear greetings from the President and Vice President of the Kansas Cattlemen's Association to your conference.

I'm Riley Robbins. I'm the current President of the Kansas Cattlemen's Association, fighting for the independent cattle producers. I appreciate what you guys are doing and wish you guys a good conference.

I'm John Ney, the Vice President of the Kansas Cattlemen's Association. I'm from Dodge City, Kansas. I send my greetings to you at the Schiller Institute, and hope you have a great conference.

## LYNDON LAROUCHE Collected Works, Volume I

This first volume of the Lyndon LaRouche Collected Works contains four of LaRouche's most important and influential works on the subject of physical economy:

- *So, You Wish to Learn All About Economics?*
- *There Are No Limits to Growth*
- *The Science of Christian Economy*
- *The Dialogue of Eurasian Civilizations: Earth's Next Fifty Years*

**So, You Wish to Learn All About Economics?** was first published in 1984 and has become the single most translated of LaRouche's books.

**There Are No Limits to Growth** first appeared in 1983 as a direct response to the Club of Rome's *The Limits to Growth*, thoroughly refuting the latter's unscientific Malthusian argument, which underlies the "green" environmentalist movement today.

**The Science of Christian Economy** (1991) is a groundbreaking study written by Mr. LaRouche during the five-year period he was unjustly incarcerated as a political prisoner in significant measure for the arguments he sets forth in this book.

**The Dialogue of Eurasian Civilizations: Earth's Next Fifty Years** (2004) follows in the footsteps of Cardinal Nicholas of Cusa to establish the scientific, cultural, and theological basis for a true dialogue of civilizations, in order to successfully address the existential crises facing humanity today.

**\$50**
